

THE PROBLEM

What gets said at the water cooler

rarely makes it to the room where decisions get made.

anonovox collects honest feedback on a cadence leadership cannot ignore — protecting the speaker, removing plausible deniability from the listener.

THE SOLUTION · THREE GUARANTEES

01

Anonymous by design

Identity decoupled at ingest. Two schemas, two roles, zero leakage.

02

Batched by cadence

Curated digests, not a firehose. Leadership reads — not skims.

03

Inevitable by delivery

Every batch is published org-wide. Silence is no longer an option.

HOW IT WORKS

01

Submit

Anyone in the org submits via the web UI — no account required.

02

Scramble

On-device AI strips stylometric fingerprints before the message leaves the browser.

03

Batch

Submissions group into themed batches. Identity is sealed in a separate schema.

04

Read · Respond

Leadership reviews and replies. Responses publish back to the org.
